

PARABOLA

School of Mathematics  
University of N.S.W.  
P.O. Box 1  
KENSINGTON. N.S.W. 2033

May 15, 1972.

Dear Reader;

VOL. 8 NO. 1

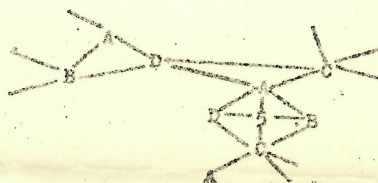

Regrettably there were three major typographical errors in this issue, which are corrected below. On behalf of all of us concerned in producing Parabola, I can only say that we will take extra precautions, in future, against such a recurrence.

Yours sincerely,

EDITOR

Error 1. Page 12. "The 4 Colour Map Problem"

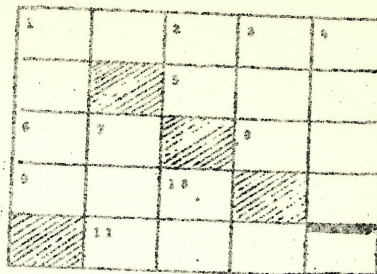

The first diagram at the top of the page showed a line joining D to D. This should be replaced by a line joining D to A as shown.

Error 2. Page 20. "Cross Number"

The blacked out bottom right hand square should be replaced by a blank square open to the left but closed by a barrier at its top, as shown here.

i.e. 4 down still contains only four empty squares, but 11 across now has four empty squares.

Error 3. Page 38 "Solution to Problem G.170"

The lines were completely omitted and should be entered as shown.
